

## Description and Application

**DW-A62L** is a rutile flux cored wire specially formulated to meet the rigorous demands for 500 MPa yield strength class low temperature service steels, as found in the offshore and shipbuilding industries.

Not only does this wire have excellent CTOD values at the standard -10°C test temperature, but is also have excellent CTOD values at the very severe test temperature of -40°C.

This wire is applied to the welding of medium to heavy section butt or fillet weld joints.
