

Description and Application

DW-A65L is a rutile flux cored wire specially formulated to meet the rigorous demands for 640 MPa tensile strength class low temperature service steels, as found in the offshore shipbuilding and chemical industries. This wire is applied to the welding of medium to heavy section butt or fillet weld joints.

DW-A65L continues to find new applications due to the increasing use of 550 MPa yield strength low temperature service steels.
