

Environmental Footprint

At Kobelco Welding of Europe B.V., sustainability is an integral part of our daily operations. We are dedicated to reducing our environmental footprint through responsible recycling of the materials used in our production and packaging. We already use materials that have been recycled. These materials are not made from virgin sources, but instead contain a significant percentage of recycled content. For example, our boxes (Ecopack) are made from more than 90% recycled paper. Through these efforts, we contribute to a circular economy and uphold our commitment to environmental stewardship.

How to Recycle our Products

Boxes (Cardboard)	can be recycled together with paper	✓
Inner Bag (Familiarc)	can be recycled together with soft plastics	✓
Inner Bag (Trustarc & Premiarc)	waste material due to aluminum layer inside	✗
Spools, 15kg WBS	can be recycled with iron waste	✓
Spools, 15kg/5kg PSP (Black Type)	can be recycled with ABS	✓
Spools, 12.5kg/12.7kg PSP (White Type)	can be recycled with PP	✓
EcoPac (Cardboard)	can be recycled with paper	✓
EcoPac (Bag)	can be recycled together with soft plastics	✓
EcoPac (Lifting Strap)	waste material	✗
Wooden Bottom Plate, Pallet and Lid	can be recycled with other wood	✓
Stretch Foil	can be recycled together with soft plastics	✓

By clearly separating recyclable and non-recyclable materials, we support a more efficient recycling process and reinforce our commitment to sustainable manufacturing.
